

ARCHIFrame

product information sheet

ARCHIFrame – it's ReFrame®, reimagined. ARCHIFrame shifts the focus from traditional fabric display systems by bringing the frame to the forefront. With a 50mm deep, 25mm wide visible frame in a range of bespoke finishes, the frame becomes a design feature for any brand display. From timber effect and polished concrete through to copper and industrial black, there's a finish to complement any graphic – and as with ReFrame®, they're all interchangeable with silicone edged fabric skins. Available as single, double sided and even with an illuminated back panel, ARCHIFrame delivers all the impact whilst bringing all the benefits of the traditional ReFrame® system.
