

Promeg[®] goes Carbon Neutral for 2020

From 2020, Megara's entire Promeg sheet range will be 100% Carbon Neutral!

As a plastics manufacturer, we are aware of our responsibility to keep the planet clean and green. So, as the proud owner of the title, "World's First Carbon Neutral Plastic Sheet", we have decided that ALL of our Promeg sheet should be carbon neutral from 2020.

Here in the suburb of Bayswater, Victoria, we both manufacture and recycled our Promeg sheet. We are proud to remain an Australian manufacturer, while sadly, we've seen many businesses move to importing products from overseas.

Recycling all of our post-industrial material – and much of our customers' waste – is a big part of who we are. In order to go still further along the path of providing environmentally responsible products, we've now committed to the offsetting of carbon emissions across our entire Promeg sheet range.

Join us by doing your bit. Let your clients know that you're using a carbon neutral material, and get the message out there that not all plastic is bad news.

For more info on how we make our Promeg Carbon Neutral, head to the Sustainability page on our website
